From: Officer in Charge, Naval Medical Administrative Unit, Monterey
To: Superintendent, Naval Postgraduate School, Monterey,
    1 University Circle, Monterey CA 93943-5100
Subj: BASELINE INDUSTRIAL HYGIENE SURVEY OF NAVAL POSTGRADUATE SCHOOL,
       MONTEREY, SCHOOL OF INTERNATIONAL GRADUATE STUDIES
Ref: (a) OPNAVINST 5100.23E, Section 0803.a
Encl: (1) Industrial Hygiene Survey Report ET-0177

1. As required by reference (a), a baseline industrial hygiene survey of the Naval Postgraduate School, Monterey, School of International Graduate Studies was conducted from 5 to 25 February 2002 by the Naval Medical Administrative Unit, Monterey Industrial Hygienist. The survey report ET-0177 is forwarded as enclosure (1).

2. Due to the size and complexity of your command, separate reports will be issued as surveys of individual areas are completed to ensure the timeliness of the information. This survey is a service provided under the overall Occupational Health Program. It is not an inspection report but is designed to assist your Command's Occupational Safety and Health Program by identifying and evaluating actual and potential occupational health hazards and the status of their controls.

3. The Navy Oversight Inspection Unit and other inspection teams rely on these surveys and the corrective actions taken as indicators of an aggressive and comprehensive Navy Occupational Safety and Health (NAVOSH) Program. Since no findings were noted and corrective actions are unnecessary, a response to this survey is unnecessary.

4. Further clarification or consultation with respect to this report is available from Eric Thurston at commercial (831) 656-2793.

S.E. THURSTON

EXECUTIVE SUMMARY

There are no findings and no corrective actions are necessary. The department will not require a resurvey until 2006 unless major changes in the workplace occur before that time.

Specific details of these findings can be found in sections II and III of this report. The cooperation of your staff, especially Cindy Graham, LCDR Kim Marshall, Mary Andrews, Dee Devlin, Susan Hudson, and Sue McElderry, was greatly appreciated.

</table>
COMMON ABBREVIATIONS AND GLOSSARY

PEL  Permissible Exposure Limit. The maximum permissible allowable exposure level of a toxic chemical or harmful physical agent (normally averaged over 8 hours) to which an employee may be exposed.

PPE  Personal Protective Equipment. Clothing or devices furnished to protect employees in performance of work in potentially hazardous areas or conditions.

ppm  Parts per million. A means for expressing the concentration of gases and vapors in air.

RFR  Radiofrequency/Microwave Radiation.

RPPM  Respiratory Protection Program Manager.

SCBA  Self Contained Breathing Apparatus.

SOP  Standard Operating Procedures.

STEL  Short term exposure limit. A 15 minute time weighted average exposure which should not be exceeded at any time during a workday.

Stressor  Potential Hazard (e.g. Noise, Chemicals, Dusts)

TLV  Threshold Limit Value. Established by ACGIH as levels of airborne contaminants or physical hazards under which it is believed workers may be exposed on a day after day basis without adverse effect.

TWA  Time Weighted Average. A method for averaging varying concentrations over a specified period of time (usually 8 hours).

WC  Work Center

WMP  Workplace Monitoring Program. A program to evaluate workplace health hazards through surveys and exposure measurement.
SECTION I
INTRODUCTION

The Naval Postgraduate School, Monterey, School of International Graduate Studies, provides instruction and facilities for research and courses involving international affairs, as well as providing administrative support for international students attending classes at NPS. Work consists of teaching, computer work, and administrative support.

If an operation has been overlooked or significant changes made which are believed to put personnel at serious risk, the industrial hygienist should be contacted, and an evaluation requested.

REPORT ORGANIZATION

Reference: (a) OPNAVINST 5100.23E, Section 0803.f

Section I - contains the background information associated with this report and the schedule for follow-up surveys.

Section II - addresses the status of the command's occupational health programs and contains a short overview of each program's status.

Section III - Contains industrial hygiene assessments of specific work areas. These assessments address the status of workplace hazards and required control procedures.

Section IV - contains the results of all the sampling/monitoring data conducted in support of this survey.

Section V - identifies the occupational health medical surveillance requirements for each work area based on survey findings.

Section VI - details the sampling required to be conducted for OSHA or NAVOSH regulated stressors or stressors which have been found to result in personnel exposures equal to or in excess of the MSAL.

Appendix A - contains the OPNAV 5100/14 forms which are required by reference (a). These forms detail the occupational exposures of employees by work center or functional group.

Appendix B - is a copy of the Change In Operation Notification form, which should be filled out whenever a major operational change occurs. By returning the completed forms to the industrial hygienist, all new operations can be evaluated as required by reference (a). This form can be copied as needed for your use.
SURVEY SCHEDULE

References: (a) OPNAVINST 5100.23E, Chapter 8, Sections 0803.b and c
(b) OPNAVINST 5100.23E, Chapter 8, Paragraph 0803.g

In accordance with reference (a), each workplace must be thoroughly evaluated to identify and quantify potential occupational hazards. To document these evaluations, an initial comprehensive (baseline) survey is needed, followed by periodic updated surveys. Reference (b) requires workplaces with recognized potential health hazards to be evaluated annually, and other workplaces to be evaluated periodically. Medical surveillance recommendations and a workplace monitoring plan are developed from the findings of these surveys. Any comments or suggestions regarding these survey schedules should be forwarded to the industrial hygienist via your Safety Office. The year of the last survey appears after each work center listing.

Change of Operations Notification:

Reference (b) requires an industrial hygiene re-evaluation when workplace changes occur. Please notify the industrial hygienist in your Safety Office whenever major changes occur in a workplace. Examples of major changes include:

- Exposure times have changed.
- New types of equipment are used.
- New chemical/chemical product usage.
- New operations are performed.
- Increase in major chemical usage.
- Changes in exhaust ventilation.

A "CHANGE OF OPERATIONS NOTIFICATION" form is provided in Appendix B and can be used for this purpose. Copy the form as needed for your use.
SECTION II
NAVY OCCUPATIONAL SAFETY AND HEALTH

PROGRAM REVIEWS

The following programs are not required to be maintained by the Naval Postgraduate School, Monterey, School of International Graduate Studies because these hazards are not present:

- Asbestos Control
- Bloodborne Pathogens Control
- Hazardous Material Control
- Hearing Conservation
- Lead Control
- Manmade Vitreous Fibers Control
- Polychlorinated Biphenyls (PCB’s) Control
- Process Control Ventilation
- Reproductive Hazard Control
- Respiratory Protection

ERGONOMICS PROGRAM

Reference: (a) OPNAVINST 5100.23E, Chapter 23, paragraph 2304a
(b) OPNAVINST 5100.23E, Chapter 23, paragraph 2306a

Repetitive tasks in this department are limited to use of desktop computers. Repetitive stress injuries have occurred in the past to scattered employees. One worker reporting arm pain identified the cause of being a cramped cubicle which did not allow proper posture while typing. Another person suffered acute back injuries resulting from being the sole person to perform heavy lifting. Personnel use aids such as dollies when lifting heavier items. Ergonomic evaluations of all work stations required by reference (a) and office ergonomics training required by reference (b) will be performed by one of the Safety Office safety specialists in the future. Personnel suffering acute problems need to contact the Safety Office to schedule such an evaluation to eliminate continuing problems.
INDUSTRIAL HYGIENE ASSESSMENT

ACTIVITY: NPS Monterey  FILE NO.: ET-0177  DATE: 12 February 2002

LOCATION: Bldg 220, Herrmann Hall, Room 064  IND. HYG: Eric Thurston

FUNCTION: This institute provides education to military and civilian healthcare professionals in host countries and at the Naval Postgraduate School, Monterey. All areas visited during the survey were offices.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems from use of computers have occurred.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
INDUSTRIAL HYGIENE ASSESSMENT

ACTIVITY: NPS Monterey   FILE NO.: ET-0177   DATE: 6 February 2002

DEPARTMENT: Defense Resources Management Institute   POC: Mary Andrews

LOCATION: Bldg 220, West Wing, 1st and 5th Floors   IND. HYG: Eric Thurston

FUNCTION: This institute provides short courses on resources management, economics, and analytical management at NPS Monterey and overseas. All areas visited during the survey were offices.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
INDUSTRIAL HYGIENE ASSESSMENT

DEPARTMENT: National Security Affairs Department       POC: Sue McElderry

LOCATION:  Bldg 302, Glasgow Hall, 3rd Floor  IND. HYG: Eric Thurston

FUNCTION: This department provides instruction and facilities for research concerning United States national security. Work consists of teaching, computer work, and administrative support. Most of the rooms are offices or classrooms.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
INDUSTRIAL HYGIENE ASSESSMENT

ACTIVITY: NPS Monterey  FILE NO.: ET-0177  DATE:  13 February 2002

DEPARTMENT: Center for Civil-Military Relations  POC: Dee Devlin

LOCATION: Bldg 220, East Wing, 1st and 5th Floors  IND. HYG: Eric Thurston

FUNCTION: Sends mobile education teams to US embassies and rarely to ships, and hosts reciprocal visits. Spaces occupied are offices or classrooms.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
INDUSTRIAL HYGIENE ASSESSMENT

ACTIVITY: NPS Monterey FILE NO.: ET-0177 DATE: 5 February 2002

DEPARTMENT: School of International Studies POC: Cindy Graham

LOCATION: Bldg 220, Herrmann Hall, Basement IND. HYG: Eric Thurston

FUNCTION: This group provides administrative support, e.g., academic, legal, financial, for international students, and provides an information program whose members make trips to California and Washington, D.C.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
INDUSTRIAL HYGIENE ASSESSMENT

ACTIVITY: NPS Monterey      FILE NO.: ET-0177      DATE: 8 February 2002

DEPARTMENT: International Defense Acquisition Resource Management
POC: Susan Hudson

LOCATION: Bldg 220, East Wing, Rooms 515 and 519
IND. HYG: Eric Thurston

FUNCTION: This group arranges for and sends graduate school of business instructors to teach classes at overseas nations.

INDUSTRIAL HYGIENE ASSESSMENT

There are no operations that potentially expose personnel to hazardous occupational stressors.

The following operations will not expose personnel to hazardous occupational stressors in excess of established health standards:

Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers. One member developed problems in the past with their right arm, wrist and hand when they were located in a small cubicle in another building, which forced them to type in awkward poses. The problems largely decreased when they obtained more ergonomically correct furniture.

There are no operations that potentially expose personnel to stressors identified by OPNAVINST 5100.23E, Chapter 29, Appendix 29-A as reproductive hazards.

RECOMMENDATIONS: None.

FINDINGS: None.
SECTION VI
INDUSTRIAL HYGIENE SURVEY DATA

This Section contains the sampling/monitoring conducted in support of this survey. It should be noted that the measured levels of chemical and physical hazards are compared to the standards without regard to any personal protective equipment that may be worn or the protection afforded by it. The goal of the NAVOSH Program is to reduce workplace hazard levels by other means so that personal protective equipment is not required.

The sampling and analyses performed in support of this survey follow methods approved and validated by OSHA, NIOSH, or by other appropriate Naval instructions. When such methods are either unavailable or not applicable, other consensus methods may be used. In all cases, accepted professional industrial hygiene practices are followed. Documentation concerning the types of instruments used and their calibration records are held by the Naval Medical Admin Unit, Monterey Bay industrial hygienist.

No new data was collected in support of this survey.
SECTION V

MEDICAL SURVEILLANCE MATRIX

The Medical Surveillance Matrix is provided to assist commands in assigning personnel to required medical surveillance. Medical surveillance for a work group must be based on exposure levels at or above the MSAL and exposure frequency of ten days per quarter or thirty days per year or as required by regulations or instruction.

Enrollment in occupational health or safety medical surveillance programs for current exposures to hazards encountered in the workplace is not recommended.
The attached Workplace Monitoring Plan presents stressors and/or systems which need to be evaluated periodically during the coming year. Items included on the plan are based on regulations, professional knowledge and information obtained from supervisors. The plan should be reviewed to ensure operational information is correct. The industrial hygienist will have to be contacted when operations are scheduled so your Command's sampling can be completed. Changes or deletions of operations should also be communicated to the industrial hygienist so that the Workplace Monitoring Plan can be amended.

APPENDIX A

OPNAV 5100/14 Forms

Reference: (a) OPNAVINST 5100.23E, paragraph 0803.f

This appendix contains the OPNAV 5100/14 forms which are required by reference (a). These forms detail the occupational exposures of employees by work center or functional group. These forms are used to develop the workplace monitoring program in Section VI. They also describe the type of work done in each area and can be used to verify that all work areas were included in the survey.

* Use the following Codes:
DR-direct reading instrument
DT-detector tube
AT-adsorption tube
IM-impinger/bubbler
FI-filter
PD-personal dosimeter
ND-noise dosimeter
OT-other (specify)

** Use the following Codes:
GA-general area
BZ-breathing zone
HZ-hearing zone
SZ-source zone
OT-other (specify)
WORKPLACE INFORMATION

Activity: NPS Monterey  Supervisor: David Lamm  Phone: (831)656-2415
Bldg#: 220, East Wing, Rooms 515/519  Shop: International Defense Acquisition Resource Management
Total Personnel: 3  Male: 1  Female: 2

Shop Operation: This group arranges for and sends graduate school of business instructors to teach classes at overseas nations.

If no exposure > MSAL, provide rationale: Ergonomics during desktop computer use. No repetitive stress injuries or problems are expected from intermittent use of desktop computers. One member developed problems with their right arm, wrist and hand when she was located in a small cubicle in another building, which forced her to type in awkward poses. The problems largely decreased when she obtained more ergonomically correct furniture.

APPENDIX B

CHANGE OF OPERATION NOTIFICATION

Please use this form to notify the industrial hygienist of any changes to operations conducted by your department. The notification form may be copied as needed. The completed forms can be returned to:

NAVAL POSTGRADUATE SCHOOL, MONTEREY
CODE 0223, SAFETY OFFICE (ATTN: INDUSTRIAL HYGIENIST)
1 UNIVERSITY CIRCLE
MONTEREY CA 93943

FOREMAN/SUPERVISOR:                                            EXT:

BLDG:          COMMAND/SHOP: NPS Monterey,           WORK AREA:
                School of International
                Graduate Studies

SURVEY REPORT:  ET-0177

INSTRUCTIONS TO FOREMAN/SUPERVISOR:

The industrial hygiene survey evaluated the potential hazards to your employees based on the operations existing at the time. When your operations change, the potential hazards can also change, and these new conditions must be evaluated. Please contact the industrial hygienist if any of the following occur:

   a. Exposure times have changed.
   b. New operations are performed.
   c. New types of equipment are used.
   d. An increase in major chemical usage.
   e. New chemicals or chemical products are used.
   f. A change in existing exhaust ventilation.

List any changes below.
