4. FIRST AID MEASURES

Inhalation: If exposed to excessive fumes, remove to fresh air. Get medical attention if cough or other symptoms develop.
Ingestion: Call physician if pain or discomfort develops. Treat symptomatically.
Skin Contact: If irritation develops or persists, remove contaminated clothing, wash skin with soap and water; get medical attention.
Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

5. FIRE-FIGHTING MEASURES

Fire: Not considered to be a fire hazard.
Explosion: Not considered to be an explosion hazard.
Fire Extinguishing Media: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special Information: Hazardous decomposition products may be formed under fire conditions. Nature of decomposition products not known.

Advice for Firefighters: Wear self-contained breathing apparatus for fire-fighting if necessary.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures: Wear appropriate personal protective equipment as specified in Section 8.
Environmental Precautions and Methods and Materials for Containment and Cleaning Up: Spills will present a slip hazard. Clean up spills with absorbent material or mop. Do not discharge to surface waterways. Dried MICRO-90 residue can be removed with warm water.

7. HANDLING AND STORAGE

Precautions for Safe Handling and Conditions for Safe Storage, Including Any Incompatibilities: MICRO-90 should be stored in a cool place in its original container. Recommended storage temperature is 5 - 43°C. The shelf life of MICRO-90 is five years from the date of manufacture when stored in the original sealed container at the recommended storage temperature.

Advice on General Occupational Hygiene: Do not eat, drink and / or smoke in work areas; wash hands after use.

Specific End Uses: A 1% to 2% MICRO-90 solution is routinely used in ultrasonic tanks, immersion, CIP, and hand-washing applications to clean a variety of surfaces, including manufacturing tanks and equipment, precision parts, medical devices, filter membranes, glass, ceramic, and electronic components. Optimum cleaning can be achieved using distilled water as the diluent and heating the solution. Cleaning should be followed by a thorough rinse.
