PURPOSE

Mission - The Working Group Meeting is a forum for Research Topic Sponsors to communicate their research and analysis needs directly to NPS faculty and students. In-Progress Reviews (IPRs) are also conducted.

Intent - Provide a single, standard mechanism that allows the Navy and Marine Corps to interface and leverage a cost efficient organic research asset.

End State - A systematic, repeatable, and enduring partnership to support Navy and Marine Corps research objectives and make NPS research directly relevant to the Warfighter.

Working Group Input - Topic Sponsor and NPS faculty research needs.

Working Group Output

- 🏆 Draft Initial Research Estimate Forms (IREFs)
- 🏆 Faculty and student relationships with Topic Sponsors
- 🏆 Partnerships for research work

SESSION DESCRIPTIONS

Topic Sponsor Sync Session: The Naval Research Working Group 19 (NRWG) kicks off with the Topic Sponsor Sync Session. The Naval Research Program (NRP) staff will give an overview of the week's events to ensure that Topic Sponsors are prepared for a successful week.

Breakout Sessions: NPS faculty and students are invited to meet with Topic Sponsors during Breakout Sessions to discuss topics and begin scoping research. Breakout sessions provide settings where individual faculty or students can meet with Topic Sponsors to discuss topic requirements, begin writing IREFs, or stage IPRs of existing research. Session attendees are encouraged to sign up for a one-on-one session with the topic sponsors via the Whova App, email or a visit to their Research Tradeshow booth, to learn more about the problem, or even provide an initial solution if the researcher is already working on a similar problem. Topic Sponsors manage their own Breakout Session schedules.

In-Progress Reviews (IPRs): Faculty members and students currently conducting research for Topic Sponsors who are in attendance during NRWG 19 should coordinate IPRs in the McNitt Ballroom, laboratories and other relevant working spaces as they see fit.

NPS Lab Tours: Lab tours are opportunities for Topic Sponsors to gain a more in-depth understanding of the specific research capabilities at NPS. Lab tour attendance requires prior registration.

Social and Research Poster Session: Building on information gathered during the lab tours, the social and poster session is primarily an opportunity for our many Topic Sponsors to gain insight on the breadth and depth of the research taking place at NPS. Our world-class faculty study the cutting-edge developments of operational navies across the globe. Their research extends the reach of today's naval services, whether underwater, on the surface, in the air, or orbiting the earth. Come see their research projects, ask them to share their expertise, and enjoy refreshments generously provided by the NPS Foundation.

SESSION DESCRIPTIONS

Moderated Revolving Panels: New this year are Moderated Panel Sessions for Topic Sponsors, faculty, and/or NPS students discuss key institutional priorities in the areas of Innovation, Human-Machine Teaming, Cyber, Artificial Intelligence, and Additive Manufacturing. Panel discussion will stimulate cross disciplinary interactions and collaboration within NPS and among Topic Sponsors.

Research Tradeshow: During the main event Topic Sponsors will man tradeshow booths in the McNitt Ballroom to discuss research opportunities, the benefits to the Services, and expected research deliverables. Faculty and students are invited to meet with Topic Sponsors during the tradeshow to discuss topics and begin scoping research to form an Initial Research Estimate Form (IREF).

Unmoderated Revolving Panels: Concurrent with the Research Tradeshow, Topic Sponsors will brief their topics in a small audience format in the McNitt Ballroom during Revolving Panel Sessions. The intent is to provide opportunities for greater in-depth discussions of topic details.

Topic Sponsor Outbriefs and Hotwash: Topic Sponsors provide feedback and suggest improvements to the Dean of Research.

SCOPE AN IREF TODAY!!

The Initial Research Estimate Form (IREF) Process Map

Important FY20 Dates:

- 🔔 **08 May:** Deadline for Faculty to Submit an IREF
- 🔔 **15 May:** Deadline for Dean/Supervisor to Approve/Disapprove IREFs
- 🔔 **22 May:** Deadline for Research Topic Sponsor to Approve/Disapprove IREFs

KEYNOTE SPEAKER

Paul Sullivan is the Director of the Applied Research Laboratory, Pennsylvania State University (ARL Penn State).

As a DoD-designated, U.S. Navy UARC (University Affiliated Research Center), ARL Penn State maintains a long-term strategic relationship with the U.S. Navy and provides support for the other services.

Director Sullivan brings to ARL Penn State a long career with the U.S. Navy, having retired in the rank of Vice Admiral. Sullivan served on USS Detector (MSO 429) where he earned his Surface Warfare Qualification. After transferring to the Engineering Duty Officer Community, he served at the Norfolk Naval Shipyard, Naval Sea Systems Command, and Supervisor of Shipbuilding in Groton, Conn. and on the staff of the Assistant Secretary of the Navy (Research, Development and Acquisition). During his engineering duty assignments, Adm. Sullivan earned his Submarine Engineering Duty Officer Qualification. Sullivan holds dual degrees of Master of Science (Naval Architecture and Marine Engineering) and Ocean Engineer from Massachusetts Institute of Technology. Sullivan served as program manager of the Seawolf-class Submarine Program (PMS 350) and the Virginia-class Submarine Program (PMS 450). Upon selection to flag rank, Sullivan served as Deputy Commander for Ship Design Integration and Engineering, Naval Sea Systems Command from 2001 to 2005.

Sullivan became the 41st Commander, Naval Sea Systems Command in July 2005. After leaving the Navy, Sullivan joined USEC Inc.(now Centrus Energy), as Vice President, American Centrifuge Project, and Chief Engineer at USEC. During his tenure at USEC, he successfully led a Joint DOE/USEC project to build and operate a test demonstration cascade of 120 centrifuge machines.

Sullivan was appointed Director of Research Related Units and Director of the Pennsylvania State University Applied Research Laboratory in 2014. He holds the University rank of Senior Scientist.
