

## **Instructor Notes for the “Life with Macros Scenario**

November 2, 2005

Students should be provided with the “CyberCIEGE Macro Viruses” lab manual.

The “Life with Worms” scenario is an example of a simple security awareness and training scenario. It is intended to be played following the “Stop Worms” scenario.

The lab manual instructs students to first let the scenario play out without taking defensive actions. After that, the student should attempt to make the proper changes.

Solution steps:

- 1) Press the play button (a balloon text will direct you).
- 2) Double click on Terry’s
- 3) Check “Regular Antivirus Updates” or “Automatic Antivirus Updates”
- 4) Answer b) Contained within documents types such as Word or Excel
- 5) Answer b) Utilize up-to-date antivirus tools

### **Student Assessment**

Student progress and results can be assessed using the Campaign Analyzer. From the CyberCIEGE desktop folder, select the “ccse” directory and then start the “Campaign Analyzer”. Click the “Select” button and the “Training” folder, and click “OK”. Select the “Life With Macros”. Each student that has played the game will appear in the list, along with summary status. If the student did not “win” the game, the status identifies the most advanced phase the student had reached. To view details of a student’s play, select that student entry and press the “View Log” button.
